

Nitish Kumar

Data Engineer

+91-8877066269 | nitishsingh2148@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Data Engineer skilled in Python, SQL, PySpark, ETL/ELT pipelines, data modeling, and data architecture. Experienced in building scalable data ingestion and transformation pipelines, designing analytical data models, implementing data quality checks, and working with Lakehouse and Data Lake concepts.

Skills

- Data Architecture & Engineering:** Data Architecture, Data Modeling, ETL/ELT Pipelines, Lakehouse Concepts, Big Data Processing, Data Lake Storage
- Programming & Analytics:** SQL, Python, PySpark, Pandas, NumPy, Statistical Analysis, Advanced Analytics
- Business Intelligence & Data Visualization:** Power BI, DAX, KPI Dashboards, Tableau, Data Profiling, Trend Analysis
- Governance, Security & Quality:** Data Governance, Data Quality, Data Preprocessing, Data Security & Compliance, Schema Validation
- DataOps & Automation:** Git, GitHub, Version Control, Automated Data Pipelines, CI/CD Fundamentals
- Leadership & Strategy:** Stakeholder Management, Requirements Gathering, Technical Communication

Experience

Data Analytics Trainee | Physics Wallah (Remote)

May 2026 – Present

Tools Used: Excel, SQL, Python, Power BI, Power Query, DAX

- ETL/ELT & Integration:** Engineered end-to-end data ingestion and transformation pipelines using **Python, PySpark, and SQL**, cleaning and integrating multi-source datasets for downstream analytics.
- Data Architecture & Modeling:** Designed relational and analytical data models using star/snowflake schema principles to optimize reporting efficiency and reduce query latency.
- Data Governance & Quality:** Implemented explicit data profiling and quality checks (schema validation, null handling, duplicate removal) to ensure high-fidelity reporting across enterprise datasets.
- BI & Stakeholder Reporting:** Developed interactive **Power BI** dashboards leveraging advanced **DAX**, dynamic slicers, and custom KPI cards to communicate actionable trends to business stakeholders.

Projects

Sales Analytics Engine & Lakehouse Pipeline | *SQL, Power BI, PySpark*

- Architecture & Integration:** Designed a unified data staging layer by joining 3 relational tables (25,000+ rows across 12 months and 5 regions) via optimized **SQL** queries and joins.
- Governance & Transformation:** Applied **Data Quality** rules and automated schema transformations to eliminate data anomalies prior to BI consumption.
- Analytics & Visualization:** Built 10+ dynamic measures/KPIs in **Power BI**, identifying a 14% regional post-festival decline that directly informed strategic marketing adjustments.

Telecom Customer Churn & Predictive Segmentation | *Python, Pandas, Advanced Analytics*

- Data Profiling & Feature Engineering:** Conducted Exploratory Data Analysis (EDA) on 7,043 customer records; engineered tenure bands and contract-type buckets to refine data segmentation.
- Statistical Analysis & Visualization:** Utilized **Pandas, NumPy, Matplotlib, and Seaborn** to run correlation and distribution analyses across monthly charges and service tenure.
- Business Outcome:** Surfaced critical churn indicators (38% churn on short-term monthly contracts), enabling proactive customer engagement strategies.

Enterprise Mobile Sales Performance Dashboard | *Power BI, DAX, Data Modeling*

- Architectural Setup:** Modeled dimensional data for multi-attribute mobile sales tracking across brands, models, locations, and payment preferences.
- Metrics & Reporting:** Developed complex **DAX** calculations to enable seamless drill-down analysis across product lines and user demographics.

Certifications

- Top 5% in SQL HackerRank Challenge – 2026** | Ranked **Top 150** among **3,000+** participants.
- Data Analytics with AI – 2026** | Physics Wallah | Certificate provided by Microsoft; developed practical knowledge of data analytics
- Google Analytics Certification – 2026** | Google | Developed skills in analytics, data interpretation, and performance measurement

Education

B.C.A (Bachelor Of Computer Applications)

Acharya Institute Of Graduate Studies

Graduated: 2026

CGPA: 8.67 / 10
